

# International Society for Quantum Gravity

## - Code of Conduct -

November 5, 2024

We expect ISQG members to act following the core values of the Society. Our core values represent guiding principles for carrying out our work and engaging with each other to advance quantum gravity:

- Scientific Methods

We rely on scientific methods and shared norms as the foundation for quantum gravity research; we recognize the evolution of scientific inquiry in this (as in others) domain.

- Integrity and Ethical Conduct

We act honestly and ethically to ensure integrity, and collaborative exchanges in quantum gravity research and across our community.

- Diversity, Inclusion and Respect

We champion a culture of mutual respect, inclusion, access, and belonging; thus, we embrace diversity in the quantum gravity community.

- Education and Learning

We promote education that nurtures curiosity and critical reflection, sparks innovation, and supports learning and discovery.

- Speaking Out

We promote our core values and speak out on issues of public interest where scientific evidence or expertise can inform or benefit society.
